

# Aspen Licensing Center

*Enabling you to better manage your aspenONE® software usage*

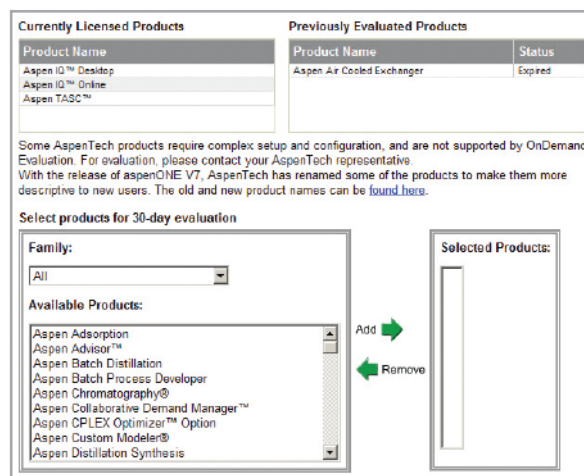

*Aspen Licensing Center helps you to better manage your software investment by enabling best practices around software utilization. Track, monitor, and optimize software usage, identify trends and generate reports, and gain insight into usage across your enterprise. In addition, Aspen Licensing Center provides quick and easy access to on-demand product evaluations. Aspen Licensing Center provides unparalleled flexibility to meet your changing business needs, assuring maximum and sustained value.*

## Key Features

- Access, Control, and Privacy:** Access to the licensing center is limited to authorized users with Customer Support accounts. AspenTech assures security in transferring your usage files through our sFTP auto-upload tool, offering you the ability to mask user information to comply with privacy regulations.
- Standard Reports:** Easily analyze your company's usage patterns through built-in standard reports, which also offers detailed views by product, product family, or server.
- Custom Reports:** Download the pivot table to access standardized reports or work with raw usage data to "slice and dice" by specific criteria to create your own reports.
- Product Evaluation:** The on-demand product evaluation feature allows you to quickly and easily download temporary license keys to evaluate additional AspenTech products.
- Log Files:** Usage management begins with knowing "who's" using "what" products and "when." Your license server(s) record this information as log files.
- Transmitting Log Files:** Transmit usage files using either direct automatic transmissions at periodic intervals or the self-serve upload capabilities. Both methods utilize secure FTP technologies.

## ||||| Keeping Tabs on Your Investment

Just as AspenTech software solutions help process manufacturers create sustainable best practices to design, operate, and optimize their business, the *Aspen Licensing Center* helps you optimize your aspenONE software. By providing tools to monitor and analyze software usage across your organization, you can make better, more informed business decisions. *Aspen License Center* is a secure web-based system that allows you to upload token usage logs, request new license files, and evaluate other products in the aspenONE suite.

The screenshot displays the Aspen Licensing Center interface. It features two main sections: 'Currently Licensed Products' and 'Previously Evaluated Products'. Below these, there is a section for 'Select products for 30-day evaluation'. This section includes a 'Family' dropdown menu set to 'All', an 'Available Products' list with items like 'Aspen Adsorption' and 'Aspen Advisor™', and a 'Selected Products' list. Green arrows labeled 'Add' and 'Remove' indicate the process of moving products between the available and selected lists.

On-demand product evaluation allows you to "test drive" any product—from the broadest offering in the industry—with a simple 3-click process.
